

# The Immune Response Trio

*Inflammoid® & Inflammoid Intensive Care®—SPM Active®—UltraInflamX Plus 360®*

Product Name	REFORMULATED Inflammoid® & Inflammoid Intensive Care®	SPM Active® Specialized Pro-resolving Mediators	UltraInflamX Plus 360®
			
Identity	<b>Dietary Supplement</b>	<b>Dietary Supplement</b>	<b>Medical Food</b>
Positioning	Modulates the <b>initiation</b> phase of the immune response	Modulates the <b>resolution</b> phase of the immune response	Advanced support for the <b>nutritional management of IBD</b>
Patient Profile	Patients affected by daily immune response due to allergies, stress, environmental toxicity. Trauma such as sprained ankle, cut. Active people with muscle pain from working out. Aging population. Patients with autoimmune disorders. Patients who need additional support for UltraInflamX Plus 360, SPM Active, and/or UltraMeal Cardio 360°. Natural aspirin for your chiropractors.	SPMs are normally produced in the body. When individuals don't produce enough levels of SPMs in response of any type of immune challenge (poor diet, health issues), the resolution of the immune system will be impacted. Supplementing with SPMs would help facilitate the body's natural resolution and completion of its response to physical stress.	Affected by immune response related to IBD (ulcerative colitis and Crohn's disease).
Facts	The initiation phase addresses the pain, heat, swelling, tenderness, redness, and loss of function associated with the immune response.1	The resolution phase reverses the initiation phase and allows tissue regeneration.1 Immune response resolution is actively driven by specialized pro-resolving mediators (SPMs). Without effective resolution, immune response can continue, and return to homeostasis is not achieved.	A medical food formulated to provide strategic macro- and micronutrient support for patients with compromised gut function resulting from IBD.
Symptoms Frequency	Acute	Acute/Chronic	Chronic
Claims	<ul style="list-style-type: none"> <li>- Both formulas feature highly bioavailable forms of CurQFen® (curcumin and fenugreek) and XNT ProMatrix (xanthohumol), which may help to support the body's response to oxidative stress, as well as other stressors*</li> <li>- Both formulas help to promote antioxidant activity in the body*</li> <li>- Inflammoid Intensive Care includes standardized Boswellia and ginger extracts, which may help support the body's immune response*</li> </ul>	<ul style="list-style-type: none"> <li>- Specialized pro-resolving mediators help promote resolution of temporary immune response after an episode of physical stress*</li> <li>- Supports healthy immune cell resolution-related activities*</li> </ul>	<ul style="list-style-type: none"> <li>- Provides nutritional support to address gut function in IBD*</li> <li>- Delivers exceptional nutritional support because it is formulated with a very specific macro and micronutrient profile*</li> <li>- Formula is gluten-free, non-GMO, and features natural flavors</li> <li>- Safe for daily consumption under the direction of a healthcare practitioner</li> </ul>
CurQFen® Proprietary Mix of curcumin (from curcuma longis L. rhizome extract) and Fenugreek Soluble Fiber (from trigonella foenum-graecum seed extract)	250 mg		250 mg
XNT ProMatrix® Protein Matrix and Polyphenols from Hops Extract (standardized to 2.5% xanthohumol)	250 mg		250 mg
Boswellia (Boswellia serrata) Gum Extract [standardized to 66.5% (137.25 mg) organic acids]	206.5 mg (IC only)		
Ginger (Zingiber officinale) Rhizome Extract [standardized to contain 5% gingerols]	100 mg (IC only)		
Active Fractionated Marine Lipid Concentrate (18-HEPE and 17-HDHA)		500 mg	
Complete Micro- and Macronutrient Profile			Please see label for more information
